

Valves and Flow Control Systems

DMI Young & Cunningham manufacture, stock and distribute valves and fluid control systems. The name of Young & Cunningham can trace its history back to 1924. Now integrated into the DMI group of companies it remains one of the UK's foremost suppliers of fluid control equipment.

The policy of the company which has not changed since its inception is to take a personal interest in the fluid handling problems of our customers, whether technical or operational and assist in the selection and supply of the correct valves by our specialist staff.

Manufacturing

DMI Young & Cunningham valves have an international standing for their quality of manufacture and operation. In particular our 'Quiclose' hydraulically tripped quick closing valve has established itself as the market leader in its class.

Foundry

Our Lloyds approved foundry and machining facility, has built an enviable reputation for producing non-ferrous castings of the highest quality.

Products

Our own manufacturing capability lies primarily in the manufacture of non ferrous valves primarily in Bronze (LG2 and LG4). DIN standard face-to-face dimensions can be supplied upon request.

Our scope of supply includes but is not limited to:

Globe	Gate	Check
Quick closing	Filters & Strainers	Storm
Gland & Plug Cocks	Sea & Sounding Cocks	Fire Hydrant
Safety & Relief	Pressure Reducing	Butterfly
Parallel Slide	Diaphragm	Knife Gate
Needle	3 Way & 4 Way	Ball

We also manufacture valves in a variety of other materials ranging from cast iron to stainless steel. The size and format of these can be adjusted to suit your particular process or application.

Markets

Originally the Young & Cunningham name was associated primarily with the supply of marine valves. However, over the years our expertise has expanded into additional markets these include: oil and gas, food and beverage, energy, water and sewerage, heating and ventilation, petrochemical and chemical, mechanical engineering, pulp and paper. The list of industries and markets we supply continues to increase on an annual basis.

Additional Services

Having our own foundry and machining facility allows for the production of bespoke product. We can design, manufacture and test to the required approval standard virtually any valve design. This is ideal for the replacement of non identifiable or discontinued items.

Although **DOBBIE McINNES®** is no longer trading we continue to offer support and service to the many existing customers still using the **DOBBIE McINNES®** automation, actuation and control panels.

Selected Partners and Suppliers

In addition to manufacturing our own range of valves, we also act as agents and suppliers for a number of carefully selected partners. These partners offer a range of products which complement and enhance the products and services we offer to our customers.

We can supply valves in virtually any material and size to suit your application, from simple manually operated ball valve to a fully automated hydraulically operated sub sea control valve, we have the solutions and expertises to meet your fluid control requirements.

Partnerships

While many merchants change the companies they represent on what would appear to be an annual basis, we choose to select the best and stick with them. Some of the companies we represent we first traded with almost 40 years ago. This understanding and knowledge offers our clients the best possible service.

Solutions

We do not view ourselves as simply a valve merchant. We prefer to view ourselves as a flow control solution provider. Our customer often approach us with a particular problem they are experiencing, we can then using are extensive knowledge and broad spread of suppliers provide economical solutions to their particular fluid control problems.

Warehouse

Our large purpose built warehouse stocks a wide range of valves for immediate despatch. This ensures we can supply the right valve to meet your requirements in time scales that are required in the modern industrial environment. We also carry a large selection of spares for the valves we supply and manufacture ensuring your investment remains working throughout its service life.

Stock

The ability to supply the correct product for a particular application in the timeframe required by our clients is key to our supply philosophy.

To this end we hold an extensive range of valves in stock for immediate despatch. The products we hold in stock cover a wide range of types, materials and formats to suit most industries applications.

Should a valve not be in stock we can call upon our extensive partners supply portfolio to be able to meet your requirements in a timely manner. As well as stocking individual valves we also stock a selected range of ready assembled hydraulic, pneumatic and electrically actuated valves in butterfly, globe and ball configurations.

Our stocking policy is not limited to finished product, we also stock a comprehensive range of spares to suit the products we manufacture and supply. Should a valve require a spare or service we can supply the required item or carry out the service/repair in our workshop.

Whether manufactured in our own Lloyds approved foundry or supplied from one of our selected partners we aim to provide high quality service and customer satisfaction.
