*If you have not heard of us already, please allow us to introduce ourselves.
Since the company's founding in 1926, Electra Brandt never lost its dynamics.
We are based in Rijnsburg, (between Rotterdam and Amsterdam) The Netherlands.
Our skilled people provide in house services in the field of:*

Diesel Injection Technique

- Repair, reconditioning and overhaul of **Diesel Injection Systems** and its components
- Repair of engine governing systems (ao GAC)
- Repair of starting systems and dynamo's
- Adjustment and timing **in situ**

We are fully equipped to test of all diesel injection systems, including **Common Rail**, used in marine, industry, and transport.

Winding Technique

- In house overhaul and re-winding of Alternators and Electrical Motors
- Repair and overhaul of pumps, gears and compressors

We rewind and recondition electric motors and generators of all different sizes.
Important detail is that the windings are **vacuum impregnated**.
For **Seawater or Chemical application** windings can be insulated according to IP 67.

Cleaning Technique

- Repair and overhaul cleaning equipment

Our Service Engineers are trained by our Principals

Furthermore Electra Brandt is **authorised distributor and stockist** for:

L'Orange
