Engineering Dutch Quality

Separators

Freshwater generators

Heat exchangers

Pumps

Back flushing filters

# The separation & filtration team

**We're an independent brand.  
Therefore we can meet your  
requirements.**

*The key to ship management is to increase the running hours between scheduled maintenance and minimise the downtime, therefore at Tulp we believe that reducing operational costs should not compromise the quality of your vessel.*

As a leader in separation and filtration technology, we understand the problems and difficulties your engineers face during the overhaul and maintenance of your equipment. Our goal is to set new quality and durability standards, to help you achieve optimal efficiency throughout the lifecycle of your separation and filtration equipment.

Tulp focusses on producing a wide range of spare parts for separators, triple screw low-pressure pumps, back flushing filters, plate heat exchangers and fresh water generators. Our fully automated in-house supply chain gives us total control over product quality and ensures full traceability of our spare parts, from raw material to final product. As we are an indepen-

dent Dutch brand, we can guarantee outstanding, unparalleled quality and offer an 12-month manufacturing guarantee to our customers.

At Tulp we continually optimise our product portfolio, creating an extensive range of stocked items. Tulp offers the most comprehensive range of spare parts for separation and filtration equipment and is therefore always able to meet your requirements. By producing locally, we can supply globally.

The unique combination of knowledge, unprecedented reverse engineering and our fully automated in-house supply chain enables us to supply high-quality products, specific and reliable maintenance solutions that will help you increase the running hours between scheduled maintenance and reduce operational costs, improving your bottom line.

*Set a new course:*

*Tulp, your separation and filtration team.*

• Our mission:  
**we keep you going, worldwide.**

Located in the heart of Europe's shipping community, Tulp strives to optimise the maintenance of its customers' separation and filtration equipment by minimising downtime and reducing operational costs. We offer the best spare parts

through an unprecedented reverse engineering programme, hold a comprehensive range of stock for quick and reliable delivery and have a good solid Dutch mentality, where a personal approach and high levels of service comes first.

## Separator spare parts

- Spare parts for the entire scope of Alfa Laval and GEA Westfalia separators.
- Complete new and reconditioned separators and bowls.

## Freshwater generators

- Complete scope of spare parts for Alfa Laval JWP 16/26/36 fresh water generators.
- Titanium plates and gaskets.

## Heat exchangers

- Complete brazed CBM 26-76 & SWEP heaters.
- Plates (titanium and stainless steel) and gaskets for all major brand heat exchangers.

## Pumps

- Complete scope of spare parts for mechanical and magnetic IMO low pressure pumps (ACD, ACE, ACP, ACG, LPD, LPE, ACF)

## Back flushing filters

- Filter elements for Moatti back flushing filters FM 150/152/180/280 & T160.
- Complete scope of spare parts for Moatti back flushing filters.

## MaxAssist

The MaxAssist programme supports our customers throughout the year with on-site servicing and repair and year-round consultancy. Our engineers have received both mechanical

and electrical training. The Tullp workshop also performs in-house inspections, repair and rebalancing services on all types of separator bowls. The Tullp workshop also overhauls complete separators.

# MAX ASSIST

### One-stop supplier

Regardless of your needs, Tullp designs, engineers and develops the products your engineers rely on to keep your vessels going. Combined with our MaxAssist programme for all mechanical and electrical issues, Tullp maximises its added value and is your one-stop supplier for all separation and filtration requirements. Tullp spare parts and services will help you to minimise your downtime, increase your running hours and reduce your operational costs, whilst improving the maintenance efficiency of your separation and filtration equipment. This means that Tullp is not only the best choice, but also the logical choice.

### Engineering Dutch Quality

Reverse engineering is the strength and foundation of our company. Our research and development department defines the material, dimensions and measurements of every single part. Using precise measuring equipment and CAD/CAM software, we create our own technical documentation. By adapting to the latest and innovative manufacturing systems, we maintain a fully automated in-house supply chain. Therefore, when overhauling your equipment, look out for the Tullp quality label and make sure you receive genuine Tullp, high-quality, ISO 9001 certified spare parts.

reverse  
engineering

### Rebalance, repair or exchange

Tullp also offers a rebalance, repair and exchange programme for Alfa Laval and GEA Westfalia bowls and complete separators.
